1	<p>In the past four years we have seen North Carolina go from 46th per pupil spending to 45th.</p> <p>This is a step in the right direction. However, I believe we have too many elected officials who are using education as a bargaining chip. As a retired teacher, I understand the difference between talking about change and implementing change. I will work at all levels to promote increasing classroom expenditures at the same time making sure that teachers have a voice in the process.</p>
2	<p>Having taught for over 30 years, I understand what it means to go from pay check to pay check. I understand what it means to have to work two and three jobs, at the same time, to be able to pay rent, buy food and pay back student loans. I know what it feels like to see a child go hungry at school and use my last dollar to buy them lunch. I understand the dedication and I understand how over worked and under paid educators truly are. Increasing salary and</p>
	<p>benefits for all school staff will be goal one on my first day of office and goal one on my last.</p>

	Even within the same district schools have different needs. We must look to the staff for direction. They
	are the experts. Governments have decided that they are the only ones who can "fix" schools.
	Teachers and staff are constantly asked to change teaching strategies and adopt new methodologies
	without funding for training or materials. It is time that we
	stop blaming the schools and begin to look at the dysfunction of our educational system at the top
	levels. As a school board member I will work to make sure every decision is based on the welfare of
	the staff, children, parents and the community.
	I thank you for your consideration.
